IF YOU ARE NO LONGER GROWING FLOWERS WILL YOU KINDLY HAND THIS LIST TO A FRIEND WHO IS FOND OF FLOWERS. THANK YOU!

This List Cancels All Previous Prices.

PRICE LIST 1943

GLADHAVEN GARDENS

George G. Fowler, Prop.

North Main Street

Franklin, N. H.

GREETINGS for the New Year and a thank you for your patronage the past few years. I hope you will be able to enjoy your flowers this summer regardless of war conditions and gas shortages. Buy War Bonds first then if you have a little money left buy a few gladiolus bulbs to brighten your home or the home of a shut-in next summer and fall.

In spite of higher cost of fertilizers and labor I am able to offer you bulbs at about the same prices as before. A low cost price list cuts costs quite a lot without lowering quality of bulbs. Many varieties are in limited supply, order early and you will not be disappointed.

CONDITIONS OF SALE

All prices are subject to the following conditions:

- (a) Any Federal or State tax that may be imposed on sales. (b) Stock on hand when order is received.
- (c) No bulbs shipped C. O. D. without a deposit of 25% of the order. (d) No minimum lot split, and no single item less than 10c. (e) Every order for not less than \$1 will be shipped prepaid to any of the 48 states in U. S. On orders less than \$1 add 10c for postage and packing.

GUARANTEE

I guarantee that the gladiolus bought from me will be true to name and properly cured for planting spring of 1943. Cannot guarantee crop or anything depending on cultivation or weather.

References: Franklin National Bank, Dun & Bradstreet.

READ CAREFULLY

The first column of figures lists the smallest or minimum lot of a kind put up. A single figure means the price for one bulb. The price would be thus for two or more bulbs, 2—10 meaning two bulbs for 10c; or 3—10, three bulbs for 10c. No single item for less than 10c. 5 bulbs for half the 10 rate.

SIZE OF BULBS

Large bulbs are 1¼ inches and over in diameter, medium size are ¾ to 1¼, averaging 1 inch in diameter. Small bulbs are ¾ of an inch and under, most of which will make a small flowering spike and grow a good bulb for the next year. Medium bulbs usually give a very satisfactory spike.

FULL CULTURAL INSTRUCTIONS WITH EVERY ORDER

ORDER EARLY, use order sheet and state when you will want bulbs. It is safe to ship Express orders at any time. Mail orders are safer shipped after March 1st. A 25% deposit will reserve your order until May 1st. No orders reserved or shipped without a deposit.

Have your name and address on the outside of every letter you write. It may save a lot of bother later. WRITE PLAINLY, and be sure to give your correct address. I am a poor guesser.

I do not substitute one variety for another unless requested. If I am out of the size ordered I fill the order with bulbs of the next nearest size, giving as much or greater value. EARLY ORDER WILL AVOID SUBSTITUTION. YES, I generally give EXTRAS.

GLADHAVEN GOLDEN HULL-LESS POP CORN

I am offering for the first time seed of my improved hull-less pop corn. I have been improving this high grade corn by selection and crossing for a number of years until I believe I have the finest quality pop corn grown. A slight cross from golden bantam sweet corn has improved the flavor. This corn is very early for pop corn, 130 days from planting to popping. The seed I sell is from choice selected ears grown in 1942. Those who have been growing tough corn with a field corn flavor and a large number of "old maids" in the bottom of the popper find it hard to believe pop corn can be so sweet and tender. Many people dry out pop corn too much; once properly dried, store in a cool dry closet. Kept in a warm room it will soon refuse to pop. Generous size package of seed for only 20c. Plant at same time you plant sweet corn in your locality. Hen manure and superphosphate well mixed about a pint to a hill, but away from contact with the seed, is about the best fertilizer for pop corn. TRY IT. Don't let over five stalks grow to the hill and have the hills at least 2½ to 3 feet apart.

SPECIAL GLADHAVEN ASSORTMENT

For those who do not care about names or who want glads for landscaping or cutting, I highly recommend this beautiful mixture comprising about every known shade in the gladiolus family. Not "loaded" with the old style small primis. All good sorts. For best results plant early in May as some will bloom in 60 days, some 75 days, some 90 days and some late varieties will take 100 days from planting. Figure what is the latest date you can have bloom before frost then go back 100 days and it will give you the latest date you should plant this assortment.

Large Bulbs,	35c per doz.	50 for \$1.10	100 for \$2.00
Medium Bulbs,	20c per doz.	50 for 60c	100 for \$1.00
Small Bulbs,			100 for 50c

Postpaid if order totals \$1

WHOLESALE PRICES PER 100 BULBS

25 of a size and variety at same rate

Not Prepaid. No order for less than \$2.00.

	Large Size	Medium Size	Small Size

DAHLIAS

We have a few more of those fancy dahlia roots at \$1.25 a dozen, postpaid. Assorted colors, large flowered mostly. Cannot be shipped until after April 1st.

IRIS ROOTS

Beautiful hardy iris, no two alike, unlabeled. Grow well in any good garden soil, full sun or partial shade if not too moist. 12 large blooming size plants, \$1 postpaid. Shipped anytime between June 15th and Sept. 1st. June planting best.

GLADIOLUS BULBLETS

Assorted, comprising most of my best kinds. 300 for 25c.

Mailed postpaid with other bulbs. For best results plant last of April or early May. Make blooming size bulbs first year.

TULIP BULBS

Expect to have a good assortment of tulip bulbs and other spring flowering hardy bulbs ready by October 1st. If interested write for fall price list ready by September 1st.

OUT FOR DURATION

Eezy Wear garden gloves, D & D insect dust and Storage Powder.

Have two pair ladies' small and two pairs ladies' medium size, 75c pair. First order gets them.

JOIN THE NEW ENGLAND GLADIOLUS SOCIETY

Send \$1 to Albin K. Parker, Box 2, Norwood, Mass., which will give you a year's membership in this society and a very fine well-bound book on the GLADIOLUS.

By reading this list carefully you can save a lot of unnecessary correspondence.

Unpack your bulbs at once when received and store in a cool place until ready to plant. DO NOT LET YOUR BULBS FREEZE AT ANY TIME.

If you have THRIPS in your garden or your bulbs, soaking the bulbs in a solution of corrosive sublimate, 1 ounce to 7 gallons of water over night at planting will help.

When you dig your bulbs in the fall be sure to have them well dried out before placing in winter storage, and don't neglect cleaning off the old bulb and roots on the base of the bulb soon after going into storage. Do not remove the husks before planting time in the spring. After cleaning, storage powder may be scattered over them at the rate of an ounce to 100 large bulbs.
